500

MINIMUM ORDER

One thing, for 35 years

Most packaging suppliers are generalists. They will sell you a box, but they cannot tell you which material or construction actually protects your product on its way to the customer. We can, because packaging for bedding and home textiles is the only thing we do.

Since 1987 we have supplied more than 700 brands in over 25 countries, from our own stock in Rijssen and through our production partners in Europe and the Far East. That combination is what makes us useful: stock items on your dock in 3 to 4 days, and custom work from just 500 pieces, in the material and print you need.

Custom from 500 pieces

Where most suppliers start at 3,000, we develop and produce bespoke packaging in small runs.

Europe or Far East

You choose: fast European production, or sharper pricing from the Far East. Both routes run through us.

Largest stock in Europe

Standard items ready to ship, delivered across Europe in 3 to 4 working days.

Certified and PPWR ready

GOTS, GRS and FSC certified, with mono-material constructions for the new European packaging rules.
